---

To Whom It May Concern,

Please be aware that a major upgrade project on the Kock's crane at our Balzano Terminal is scheduled to start on/about September 27<sup>th</sup>, 2021. The crane is projected to be out of service for 30 days and should be available to return to service on/about October 27<sup>th</sup>, 2021. The crane will be positioned at the extreme southern end of the terminal, boomed down and without power for the duration of the upgrade project. Please use caution when docking vessels in Berth 4, just north of the down crane. Please do not book cargo on breakbulk vessels in excess of ships' gear limitations during this crane outage period. Updates will be periodically sent out as the project progresses.

Thank you for Your Cooperation,

**Kevin Duffy**  
Assistant Executive Director / Chief Operating Officer
